

Brief CV

Name	Huixuan Shi	中文名	史会轩	
Gender	Female	Country	China	
Title	Dr.	Position	General Manager Assistant	
University/Department	Wuhan NARI Limited Liability Company of State Grid Electric Power Research Institute			
Research Area	High-voltage insulation and test technique, condition monitoring and fault diagnosis			

Brief introduction of your research experience:

I was awarded PhD degree in System Analysis and Integration from HUST in 2008. And I am an senior engineer at State Grid Electric Power Research Institute. My research interests include high-voltage insulation and test technique, and condition monitoring and fault diagnosis.

I have undertaken more than 10 import research projects, for instance, State Grid Corporation of China major projects, national science and technology major projects, and so on. Besides, I have undertaken many major engineering projects, involving Automatic logistics technology, Intelligent storage technology and Automatic detection technology. In recent five years, 17 academic papers have been published, and 22 patents have been authorized. Furthermore, I have taken part in many national standards and enterprise standards.
